Profile

Frontend developer (React, TypeScript) with 10+ years of experience in digital product environments and several years of hands-on frontend development.

I enjoy building maintainable and user-friendly frontend solutions, with experience in API integrations, server-state management, and complex UI flows. I care about creating simple and scalable solutions that combine technical quality with thoughtful user experiences, including animations and interaction design.

My background combines frontend development with strong product and collaboration skills, and I thrive in cross-functional teams working across frontend, backend, UX, and product.

Projects and background: lilu.dev

Experience

Frontend Developer (Freelance)

Freelance | 2024 – present

- Developed a React application from scratch for managing data during tabletop roleplaying games
- Implemented TanStack Query for API handling, server-state management, and caching in a React application
- Simplified and refactored the frontend of a Blazor application to improve long-term maintainability within a startup team with limited frontend resources
- Developed several websites using Astro and Sanity CMS with a focus on performance, maintainability, and server-side rendering
- Collaborated with clients to translate business requirements into maintainable frontend solutions

Product & Project Lead

FOA | 2023 – 2024

- Contributed to the development of a web platform and mobile application with a shared backend architecture
- Translated user and business requirements into concrete product and technical solutions in collaboration with frontend, backend, and UX teams
- Helped define API contracts and data flows to support personalized user experiences in the mobile application
- Coordinated stakeholders and prioritized development efforts to ensure alignment across product, design, and engineering
- Supported the successful delivery of a solution for a new user group within project timelines

Skills

Frontend

React • TypeScript • Astro
• Tailwind

Data & State

TanStack Query • API integration •
State Management

UX / UI

Component Architecture •
Interaction Design • Figma

Backend / CMS

.NET/C# • Sanity CMS

Tools

Vite • ESLint + prettier • Git/
GitHub • GitHub Copilot

Education

MSc in Physics

University of Copenhagen, 2015

- Strong analytical and problem-solving skills
- Experience working with complex systems, data, and abstraction
- Background in algorithms, modelling, and computational thinking

Experience (continued)

Digitalisation Consultant & Team Lead (Product Development)

NEXT Uddannelse København | 2020 – 2023

- Worked at the intersection of business, development, and users to align technical solutions with real user needs
- Translated complex requirements into user stories and contributed to decisions around system architecture, integrations, and data flows
- Collaborated closely with developers, IT, and external vendors to improve communication, prioritization, and delivery processes
- Led initiatives focused on improving digital workflows, usability, and cross-functional collaboration across educational platforms
- Introduced a Shape Up-inspired workflow that improved prioritization, focus, and delivery of completed solutions

Programming & Physics Teacher

Københavns Mediegymsnasium | 2016 – 2021

- Taught JavaScript and creative coding (p5.js, ml5.js)
- Communicated complex technical concepts in an accessible way
- Developed practical, hands-on teaching materials

Frontend Developer

Netcompany (TDC Erhverv) | 2015 – 2016

- Developed reusable React UI components for a self-service platform integrated with backend systems
- Collaborated closely with backend developers on API design and frontend data flows across distributed teams
- Identified and reduced complexity in frontend state management through incremental refactoring and structural improvements
- Contributed to frontend architecture decisions with a focus on maintainability and long-term scalability
- Took ownership of a core area of the solution during a period of reduced team capacity and delivered functionality on schedule

Selected Projects & Courses

Web Development - Backend

Diploma course in .NET backend development. Project: survey app with feedback functionality, 2018

Digitalisation in Practice, ITU

Course in business, change management, and human behaviour, 2021

Leading Digital Transformation, DTU

Diploma course in digitalisation and digital transformation with a focus on leadership, business needs, and change management, 2021
